

DESNA GII B7129

Low semi-fitted, modular boots for firefighters. New generation COMFORT LINE model Desna. The entire GII line stands out for its unique sole with sophisticated self-cleaning tread, durability and auxiliary grip, made of durable cowhide leather with hydrophobic treatment.

DESNA GII

EN 15090:2012

EN ISO 20345

STANDARDS:

EN 15090:2012 (EN 15090:2012)

EN ISO 20345:2012 (EN ISO 20345:2011)

Colour: Black + Neon Yellow 

Membrane: PU B7129-01
PTFE B7129-02

UPPER MATERIAL:

- Cowhide leather 2,0-2,2 mm with hydrophobic treatment.
- TPU toe protection.
- Composite toe cap.
- Inner padding made of soft foam material.
- Reflective elements.
- GRIP system for easier slipping on and carrying the shoe.
- Combination of lacing and lace-up with drawstring adjustable strap.

SOLE:

- EXPLORER rubber sole.
- Self-cleaning design.
- Zones with special profiles.
- Anti-static, non-slip, resistant to oils, acids and fuels.
- Heat resistant to 250 °C.
- Shock absorber – in the heel area of the sole to cushion impacts while walking.

ANTIPERFORATION INSOLE:

- Composite textile with a puncture-resistant plate.

REMOVABLE INNER SOLE:

- Anatomical, anti-static.
- Insole can be inserted for up to 3 foot widths.

LINING:

- 4-layer with PU membrane.
- Available also with PTFE.

TOE CAP:

- Composite – lighter weight than a steel insole. Provides high strength under mechanical stress and impact resistance.

TOE PROTECTION:

- Anti-kick TPU toe protection.

DESNA GII B7129

Shoe features for DESNA GII

F2A	Firefighter's footwear type 2
HI ₃	Heat insulation
SRC	Anti-slip properties
P	Puncture resistance
T	Impact resistance
A	Antistatic footwear
CI	Cold insulation
HRO	Contact Heat Resistance
FO	Oil resistance

MAINTENANCE

Treat dry and cleaned boots with a cream with hydrophobic effect. You can use a suitable waterproofing spray designed for treating membrane boots made of smooth leather. Store the boots dry, cleaned, and treated in a dry and ventilated environment.

WE RECOMMEND USING:

Holík Boot Cream

This product is designed for treating and maintaining membrane's boot in demanding climatic and working conditions. Due to the balanced ratio of hydrophobic ingredients, this cream perfectly treats, softens, and waterproofs membrane boots while maintaining the microclimate inside the boot. It covers very well and significantly revives the colour of the boot. It greases the leather and makes it water-resistant. The treatment cream comes in a practical box with a separate sponge.

Holík Waterproofing Spray

A highly effective waterproofing spray for leather and textile. The fluorocarbon-based waterproofing replenishes the water-repellent, oil-repellent, and dirt-repellent treatment while keeping the product breathable. Apply the waterproofing to a cleaned, dry product in a thin layer and let it dry for at least 12 hours.
