LESNA GII B7126

New generation of COMFORT LINE model Lesna. The entire GII line is distinguished by a unique sole with a sophisticated self-cleaning tread, durability and auxiliary grip with a super durable cowhide leather with hydrophobic treatment.

LESNA GII

Colour:	Black	
Membrane:	PU	B7126-01
	PTFE	B7126-02

UPPER MATERIAL:

- Cowhide leather 2,4–2,6 mm with hydrophobic treatment.
- Ankle protectors.
- TPU toe and heel protection.
- Composite toe cap.
- Inner cushioning made of soft foam material.
- Flexible segmentation in the heel area.
- Reflective elements.
- GRIP system for easier slipping on and carrying shoes.

SOLE:

- EXPLORER rubber sole.
- Self-cleaning design.
- Zones with special profiles.
- Anti-static, non-slip, resistant to oils, acids, fuels.
- Heat resistant to 250 °C.
- Shock absorber – in the heel area of the sole to cushion impacts while walking.

ANTIPERFORATION INSOLE:

- Composite textile with a puncture-resistant plate.

REMOVABLE INNER SOLE:

- Anatomical, anti-static.
- Insole can be inserted for up to 3 foot widths.

LINING:

- 4-layer with PU membrane.
- Available also with PTFE.

TOE CAP:

- Composite – lighter weight than a steel insole. Provides high strength under mechanical stress and impact resistance.

EN 15090:2012 EN ISO20345

STANDARDS:

- EN 15090:2012
- EN ISO 20345:2022
- Certification for orthopedic insoles complying with DGUV 112-191

LESNA GII B7126

Shoe features for LESNA GII	
F2A	Firefighter's footwear type 2
HI_3	Heat insulation
SR	Anti-slip properties
PL	Puncture resistance
T	Impact resistance
A	Antistatic footwear
AN	Ankle protection
CI	Cold insulation
HRO	Contact Heat Resistance
FO	Oil resistance
SC	Scuff Cap Abrasion Resistance
LG	Ladder Grip

TOE PROTECTION:

- Anti-kick TPU toe protection.

HEEL PROTECTION:

- TPU heel protection.

MAINTENANCE

Treat dry and cleaned boots with a cream with hydrophobic effect. You can use a suitable waterproofing spray designed for treating membrane boots made of smooth leather. Store the boots dry, cleaned, and treated in a dry and ventilated environment.

WE RECOMMEND USING:

Holík Boot Cream
This product is designed for treating and maintaining membrane´s boot in demanding climatic and working conditions. Due to the balanced ratio of hydrophobic ingredients, this cream perfectly treats, softens, and waterproofs membrane boots while maintaining the microclimate inside the boot. It covers very well and significantly revives the colour of the boot. It greases the leather and makes it water-resistant. The treatment cream comes in a practical box with a separate sponge.

Holík Waterproofing Spray
A highly effective waterproofing spray for leather and textile. The fluorocarbon-based waterproofing replenishes the water-repellent, oil-repellent, and dirt-repellent treatment while keeping the product breathable. Apply the waterproofing to a cleaned, dry product in a thin layer and let it dry for at least 12 hours.
