LIPA GII B7128

The new generation of COMFORT LINE model Lipa. The whole GII line is distinguished by a unique sole with a sophisticated self-cleaning tread, durability and an auxiliary grip with an extra durable cowhide leather with hydrophobic treatment.

LIPA GII

Colour: Black

Membrane: PU B7128-01
PTFE B7128-02

UPPER MATERIAL:

- Cowhide leather 2,4–2,6mm with hydrophobic treatment.
- Inner padding made of soft foam material.
- TPU toe protection.
- GRIP system for easier putting on and carrying of the shoe.
- Composite toe cap.

SOLE:

- EXPLORER rubber sole.
- Self-cleaning design.
- Zones with special profiles.
- Anti-static, non-slip, resistant to oils, acids, fuels.
- Heat resistant to 250 °C.
- Shock absorber – in the heel area of the sole to cushion impacts while walking.

ANTIPERFORATION INSOLE:

- Composite textile with a puncture-resistant plate.

REMOVABLE INNER SOLE:

- Anatomical, anti-static.
- Insole can be inserted for up to 3 foot widths.

LINING:

- 4-layer with PU membrane.
- Available also with PTFE.

TOE CAP:

- Composite – lighter weight than a steel insole. Provides high strength under mechanical stress and impact resistance.

TOE PROTECTION:

- Anti-kick TPU toe protection.

EN 15090:2012

EN ISO 20345

STANDARDS:

- EN 15090:2012
- EN ISO 20345:2022
- Certification for orthopedic insoles complying with DGUV 112-191.

MAINTENANCE

Treat dry and cleaned boots with a cream with hydrophobic effect. You can use a suitable waterproofing spray designed for treating membrane boots made of smooth leather. Store the boots dry, cleaned, and treated in a dry and ventilated environment.

WE RECOMMEND USING:

Holík Boot Cream
This product is designed for treating and maintaining membrane´s boot in demanding climatic and working conditions. Due to the balanced ratio of hydrophobic ingredients, this cream perfectly treats, softens, and waterproofs membrane boots while maintaining the microclimate inside the boot. It covers very well and significantly revives the colour of the boot. It greases the leather and makes it water-resistant. The treatment cream comes in a practical box with a separate sponge.

Holík Waterproofing Spray
A highly effective waterproofing spray for leather and textile. The fluorocarbon-based waterproofing replenishes the water-repellent, oil-repellent, and dirt-repellent treatment while keeping the product breathable. Apply the waterproofing to a cleaned, dry product in a thin layer and let it dry for at least 12 hour
